Books that tell children about the lives of real people, or about real things in the world, are nowadays not at all dull and not at all like lesson books. One of the best of the life stories, or biographies, of famous people is *Mother Teresa* by Anne Sebba. Other similar books are *A Hand Upon time* (about Charles Dickens) and *Mountbatten: Hero*. Some books are a part of a series, each title a separate biography of some famous person. There are many books about people who live ordinary lives but who represent the changing face of the world. There are books about people who have led their countries through times of great stress, and about people who work for and within a particular belief.

People have differing interests in life, and there are a great many books available to cover most hobbies and leisure activities. Subjects such as music, painting, camping, and crafts are covered for various age-groups, so that readers should always be able to find something of interest.

Passage 2:

The earliest human beings learned to measure time by the regular reappearance of certain events. The most obvious of these was the endless pattern of alternation between light and dark that we call day and night. We now know that day and night are caused by the rotation of the Earth on its axis, so that for part of the time a place on the globe faces toward the Sun and for the rest of the time it is turned away from it. To early people a day meant the span of time between sunrise and sunset. We still commonly use the word in this way to distinguish it from the period of darkness that we call night. But as law and civilization developed, it became necessary to identify days more accurately and to work out when they began and ended.

Some days had to be set aside for market trading, and a regular number of days went by between one market day and the next. This was the origin of what we now call the week. The ancient Babylonians, the Egyptians, the Greeks, and the Romans all evolved weeks of varying lengths. The Jews followed the Babylonians in setting one day aside for the rest from work. They called it the Sabbath, though the Jews invented their Sabbath for religious purposes.
